Pro vs. Con Resource

ProCon.org is a useful, free online resource that presents controversial issues in an objective, well-balanced format. Topics covered at ProCon.org include a broad range of subjects, including immigration, the invasion of Iraq, and medical marijuana to name a few.

The library offers a similar resource through its [online databases page](#) called [Opposing viewpoints](#). Opposing Viewpoints is a resource that is designed to aid students researching current day controversial issues. This database brings together much of the information needed to fully understand an issue and assists students with researching, analyzing, and organizing various types of data for research assignments, persuasive essays, and debates.

These are both very useful resources when searching for information related to controversial or heavily debated topics.
